DETAILED ACTION

Allowable Subject Matter

1. Claims 52-56 and 58-102 (renumbered 1-50) are allowed. The following is an examiner's statement of reasons for allowance: the closest prior art of record is Matsumoto (US 5,226,987). Matsumoto teaches a tire construction having a rubber layer or reinforcing layer 3 disposed between the tread and an underlying belt structure, wherein said rubber layer is made of a rubber composition having a high dynamic elastic modulus E' (Column 2, Lines 30+). While the reference further teaches that said composition can include known reinforcers (Column 4, Lines 1-5), one would not have found it obvious to form the rubber layer of Matsumoto with a composition demonstrating the claimed mechanical properties, including the combination of elastic dynamic modulus, tensile modulus ratio, and percentage variation between modulus at 10% elongation in a direction parallel to the equatorial plane of the tire with respect to modulus at 10% elongation in a direction perpendicular to the equatorial plane of the tire.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
